VISION

The vision for the development at Mains of Luther is to provide a high quality service area, enabling residents and visitors of the North East to enjoy local produce and appreciate their surroundings.

It intends to offer a high quality and enjoyable experience no matter when and how long your stay.

Exceptional Food and Drink

Mains of Luther will celebrate the region's food, drink and produce by reaching out to local producers in the North East to stock and serve the very best quality products in the proposed shop, cafe and restaurant.

Design and atmosphere

The design and orientation of the buildings will allow visitors to take in the surrounding countryside, and beyond, to the Angus Glens. Buildings are proposed to take inspiration from the local farming landscape, be of a quality design and use a mix of natural and modern materials. They will embrace traditional architectural styles with a warm, welcoming atmosphere whilst integrating modern and sustainable design themes.

Engage with the land

Play areas and activities are proposed for the outdoor area of the site. Seasonal workshops, fairs and activities may also be accommodated in this space to provide fun and informative events for visitors.

Visitors can use Mains of Luther as a starting point to explore both mountain and sea.

Something for everyone

It is important to ensure the facility will appeal to a wide cross-section of visitors. A café and farmshop is proposed for day-time trade, with a restaurant and hotel catering for evening trade. Play areas will appeal to younger generations, whilst others may wish to browse around the shop, or stroll around the grounds.

"*We are proud* of our farm and *deeply rooted* to this place—take a break from your journey, come and see why we are so passionate about Luther"
